THE JOURNAL OF THE AMERICAN MEDICAL ASSOCIATION
PUBLISHED WEEKLY
535 N. Dearborn Ave., Chicago, Ill. 60610

Subscription prices: \$12.00 per year in advance. Single copies, 35¢. Second-class postage paid at Chicago, Ill., and at additional mailing offices. Postmaster: Send address changes in U.S.A. to JOURNAL OF THE AMERICAN MEDICAL ASSOCIATION, 535 N. Dearborn Ave., Chicago, Ill. 60610. Outside U.S.A., send to The British Medical Association, 11, St. Andrews Place, Regents Park, London, N.W.1, England.

THE JOURNAL OF THE AMERICAN MEDICAL ASSOCIATION is published weekly, except for two issues combined annually in December. The combined issues are published on December 15 and December 22.

The Journal of the American Medical Association is a peer-reviewed journal that publishes original research, clinical studies, and reviews. It is one of the most influential medical journals in the world. The journal is published by the American Medical Association, which is a professional organization of physicians in the United States. The journal's content is focused on the practice of medicine and the advancement of medical knowledge. It is a valuable resource for medical professionals and researchers alike.

- QUESTIONS**
1. What is the main idea of the passage?
 2. What is the author's purpose in writing this passage?
 3. What is the author's attitude towards the subject?
 4. What is the author's tone?
 5. What is the author's style?
 6. What is the author's point of view?
 7. What is the author's main argument?
 8. What is the author's conclusion?
 9. What is the author's recommendation?
 10. What is the author's final thought?

STAFF NAVIGATOR

• *Hydraulic Draining*

A STAFF NAVIGATOR, who is responsible for the navigation of the ship, must be able to handle the ship in all conditions of weather and sea. This is a difficult task, and one which requires a high degree of skill and experience.

It is the duty of the staff navigator to keep the ship on the intended course, and to avoid all obstacles. This is a task which requires a high degree of skill and experience.

Calibrate for Correctness

For the purpose of obtaining correct results in the use of the instrument, the user must first calibrate the instrument. This is done by comparing the instrument's readings with those of a known standard.

The instrument is then adjusted so that its readings are in agreement with those of the standard. This is done by turning the adjustment screws on the instrument's face.

The instrument is then ready for use. The user should always check the instrument's readings against those of a known standard before using it.

The instrument is used to measure the weight of objects. It consists of a vertical column with a horizontal arm at the top. The arm is graduated in units of weight.

The instrument is used to measure the weight of objects by placing them on the horizontal arm.

The instrument is used to measure the weight of objects by placing them on the horizontal arm.

The instrument is used to measure the weight of objects by placing them on the horizontal arm. The user should always check the instrument's readings against those of a known standard before using it.
