October 14 1942

Teachers in Fredericton Salvage Area,

The Allied War Effort is in need of all the scrap iron, metal, rags and rubber that our country can collect. You are in a position to aid in this effort and encourage our younger generation to present a united front toward a ruthless foe.

The Local Salvage Organization working through the Schools and other Organizations proposes to collect 100 tons of Scrap Iron and 50 tons of Rubber before the 30th day of November.

Metal and rubber will be collected by school drives and deposited at some convenient place in the school yard where it will be picked up by the salvage truck.

Aluminum, copper, brass, bronze, zinc, lead, iron and steel are all needed. Rubber and rags are essential. (No use can be made of tin cans, automobile fenders or bodies and paper)

When you have a collection make a rough estimate of the weights, fill in the enclosed card and mail.

Every teacher and pupil engaged in this campaign will be rendering their country a vital service at a time when VICTORY will be the reward for united and wholehearted endeavor.

Yours truly,

347 Saunders St.
Fredericton, N.B.

E.L.Flowelling
Sec't Salvage Committee.

NOTHING THAT CAN BE THROWN AT THE ENEMY MUST BE THROWN AWAY
NATIONAL SALVAGE CAMPAIGN
Fredericton Depot

The Salvage Organization for Fredericton and vicinity is desirous of contacting all communities within this military area and encouraging organized collections of salvage.

The need for many materials is great, for some it is almost desperate. There are two million homes in Canada and two million times the scrap from the average home is a lot, so lets get busy.

The Japs and the Germans are a frugal people. They knew our easy going habits and counted on them to keep us from total war effort. They didn't think we could cut down on our civilian needs, salvage waste and throw everything into winning the war. Lets fool them and prove to ourselves that we too can use poorer materials, do without luxuries-yes even without many essentials- in order that our fighting man should have only the best.

Let us make 'SALVAGE' our motto and remember that rubber, metals, paper, rags must be saved, for TO WASTE SALVAGE IS SABOTAGE.

The Department of War Services, anxious to encourage salvage and give the citizens of Canada an added urge to co-operate, has ruled that the funds raised through the sale of salvage shall be used for local war purposes. As this military area lacks a recreational centre it has been arranged that all funds obtained through the sale of salvage be used to maintain such a centre.

Fredericton, being a basic training centre, is the starting point in the military training of many recruits. These lads need a welcome and some encouragement on this, the first step in their military life. They need some place to go to, other than the street corners, where they can meet their friends and forget camp life for awhile. The boys from your community are here and by co-operating in the salvage campaign you are both helping the actual war effort and also looking after the welfare of our armed forces.

Whether your community has been collecting or not kindly answer and send details of your needs and a member of the committee will meet with your organization and help to clear up any difficulties

LET'S MAKE THIS AREA TRULY SALVAGE MINDED

Yours truly
